COMPANY PROFILE

A.D. COOTE & CO.
THE METAL SPECIALISTS

METAL PTY LTD.

Des Coote
(1932 - 2009)

A.D. Coote & Co.'s success and reputation as 'The Metal Specialists' is built on the core values of Founder Des Coote: a steadfast commitment to absolute client service, integrity and reliability.

Throughout its long history as a family owned company, A.D. Coote & Co. has established itself as a major supplier of efficient, reliable and effective light pole and metal fabrication solutions for Government and Private clients throughout Australia. The company's loyal client base features Western Power, Local Councils, Main Roads, Department of Defence and various mining and power generation companies. Accolades include over twenty years of exclusive supply of light poles to Western Power, the iconic street lighting that lines Scarborough Beach Rd and Beaufort St in Perth and large conveyors for Ma'aden in Saudi Arabia.

In addition to the lighting columns on which its reputation is built, A.D. Coote & Co.'s sheet metal fabrication has become well established throughout Australia. The Welshpool factory is set up to be fast-reactive and flexible, allowing for the production of a variety of products.

50 YEARS OF WESTERN AUSTRALIAN FAMILY VALUES

Established for over 50 years in Western Australia, A.D. Coote & Co. leads the way in the manufacture and delivery of quality sheet metal products throughout Australia including steel columns for street lighting, sports floodlighting and car parks.

A.D. Coote & Co. (Sheetmetal) Pty Ltd was incorporated in 1968 to make sheet metal products for its parent company, A.D. Coote & Co. (Plumbers) Pty Ltd (incorporated two years earlier in 1966.) Both companies were founded by Mr A. D. (Des) Coote. The sheet metal company grew from manufacturing downpipes and guttering for plumbing materials into a large sheet metal factory housing a 150 tonne pressing machine; the largest of its kind in the Southern Hemisphere at the time of installation.

As A.D. Coote & Co. (Sheetmetal) Pty Ltd's facilities grew, its entrance into lighting columns in the early 1980s would see the company outgrow its parent company - becoming the primary supplier to Western Power among a wealth of national and international clients.

Still operating from a fully equipped factory in Welshpool, A.D. Coote & Co. continue to uphold client service excellence, value well beyond contractual statutory, the strictest regulations for safety, service quality and reliability.

A.D. Coote & Co. is a ISO 9001:2015 QMS Accredited Company that guarantees commitment to:

- Excellent service and communication
- Strategic management & planning
- Adherence to documented process and standards requirements
- Competitive value without compromising quality
- A strive for constant improvement

LIGHT INDUSTRY

Operating in a local and iconic factory on Welshpool Road since the 1970s, A.D. Coote & Co. fabricate components and complete systems for projects large and small.

We provide for a wide range of industries including Government, Defence, Mining, Construction, Agriculture and Architecture.

- Bike racks
- Handrails
- Balustrade
- Bridge and deck structures
- Street furniture
- Bins
- Shelters

Our full fabrication facilities include large custom benders, presses and guillotines.

To ensure maximum flexibility and customisation for our clients, our highly qualified sheet metal workers and welders fabricate using a wide range of metals including:

- Steel
- Aluminium
- Stainless steel
- Colorbond
- Zincalume and Zinc anneal
- Copper
- Brass

STAINLESS STEEL & ALUMINIUM

We at A.D. Coote & Co. can take care of all your stainless steel and aluminium fabrication. From simple parts through to complex prototypes and large structures, we can fabricate, paint, passivate and polish to your project requirements.

POLES

A.D. Coote & Co. are an ISO 9001:2015 QMS accredited company. We can provide engineering certification for pole and pole footing designs.

We have presses ranging from 50 to 150 tonnes and the capability to design, detail and manufacture a wide range of poles for all applications including:

- Street lighting
- Architectural / custom made poles
- Sports lighting towers
- Banner poles
- Centre hinged
- CCTV
- Solar poles
- Frangible / impact absorbing and slip base
- Cyclone rated

BEAUTY WITH FUNCTIONALITY

Designed and engineered to provide a home for today's Smart City infrastructure, the Urban Aluminium Multi-function Pole (UA MFP) delivers a solution that satisfies the technical requirements to support a range of applications whilst delivering aesthetics that will enhance the environment.

Poles are manufactured in marine grade structural aluminium and may be built up to a height of 12m. The high capacity base section can accommodate multiple applications and the upper mast includes a patented equipment mounting system that enables the attachment of today's IoT technologies and accessories, with the ability to retro-fit tomorrow's innovations.

THE UA MFP IS FUTURE PROOFED

Available in anodised or painted finishes, the UA MFP delivers a long lasting, corrosion free, innovative solution for your Smart City.

Urban Aluminium also offer soil testing, footing design and certification as well as pole installation.

THE METAL SPECIALISTS

INTRODUCING STEM ARCHITECTURAL ALUMINIUM LIGHT POLES.

ENGINEERED BEAUTY

Designed and engineered to enhance the streetscape or park, we offer tapered, square and straight sided poles in a range of heights to 9m. Where custom designs are needed we have a vast depth of experience.

Available in anodised or painted finishes, poles are designed to accept pole top light fittings or fittings mounted on single or twin light arms up to 2m outreach.

Accessories may be attached using our Urban Aluminium Accessory Point mounting bracket.

Urban Aluminium maintains stock of standard poles along with foundation cages and hold down bolts.

We also offer soil testing, footing design and certification as well as pole installation.

FUTURE SMART

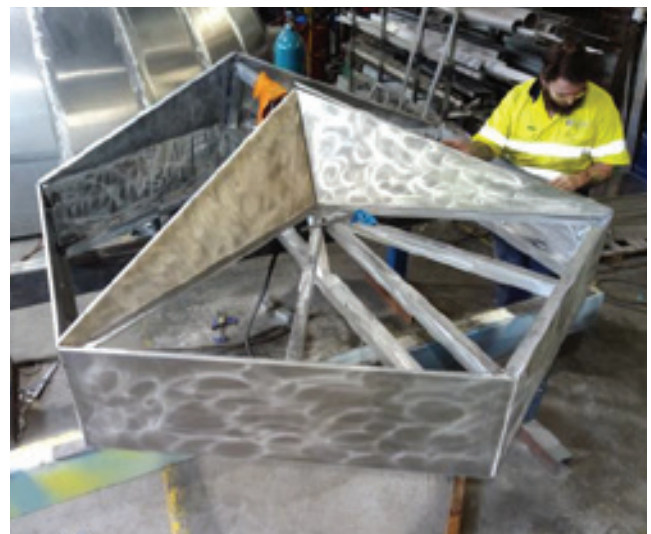

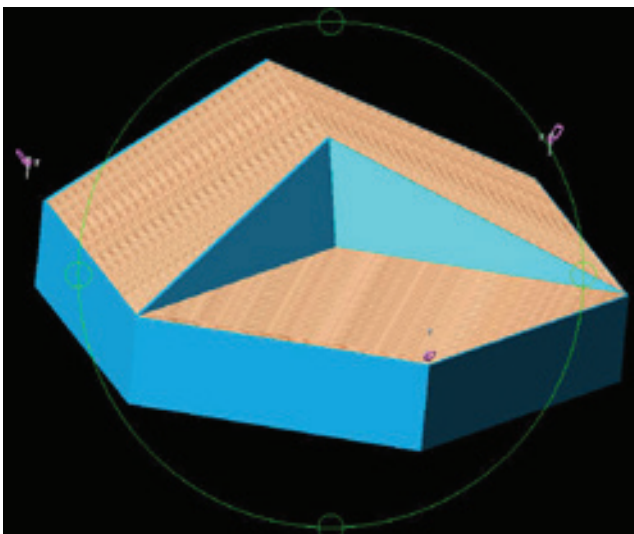

A.D. COOTE & CO.

THE METAL SPECIALISTS

In 2018 A.D. Coote & Co. procured the street furniture for the City of Rockingham for its visionary foreshore project.

The street furniture as designed by Place Laboratory is a modern, bespoke and technical design.

Fabricated in 20mm Aluminium, lined in Recycled Spotted Gum and painted in 2 pack paint the project was complex and many obstacles were overcome to achieve the high-quality aesthetic the project demanded.

CUSTOM FABRICATION & DESIGN

Let's work together on
your next project.

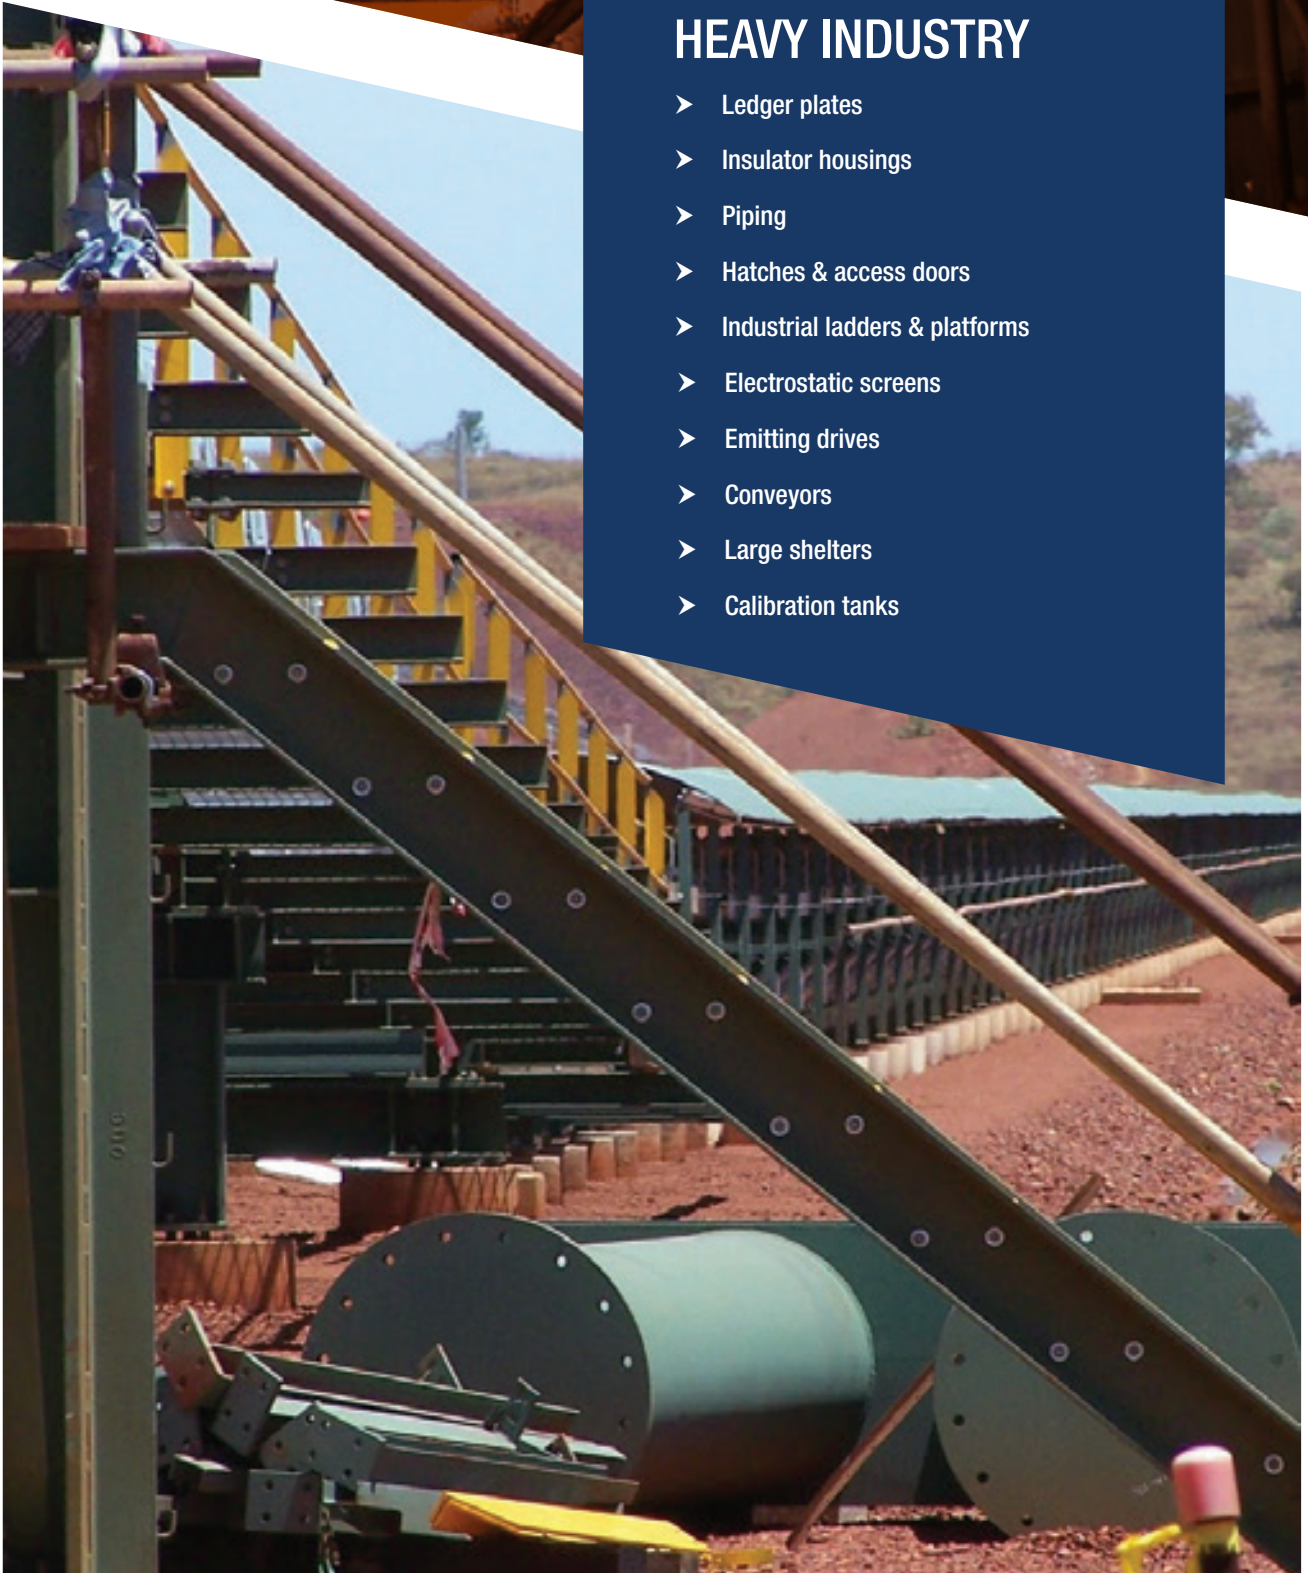

FABRICATION

Operating in a local and iconic factory on Welshpool Road since the 1970s, A.D. Coote & Co. fabricate components and complete systems for projects large and small.

We provide for a wide range of industries including Government, Defence, Mining, Construction, Agriculture and Architecture.

HEAVY INDUSTRY

- Ledger plates
- Insulator housings
- Piping
- Hatches & access doors
- Industrial ladders & platforms
- Electrostatic screens
- Emitting drives
- Conveyors
- Large shelters
- Calibration tanks

DESIGN

Fabrication of simple components right through to the design, fabrication and installation of complete projects.

With certified staff and the speed and convenience of local Australian service, any job is possible.

- **CLIENT CONSULTATION**
- **DRAWINGS & DESIGN**
- **DETAILING**
- **ENGINEERING CERTIFICATION**
- **SITE SURVEYING**

PRODUCTION

Project managers at A.D. Coote & Co. are trained to run the entire project smoothly and efficiently, with accurate documentation and thorough communication.

- **PROJECT MANAGEMENT**
- **WELDING & MATERIAL CERTIFICATION**
- **ALL REQUIRED DOCUMENTATION**
- **Q&A TEST REQUIREMENTS**
- **SURFACE TREATMENTS & CERTIFICATIONS**

CASE STUDY

BUSSELTON AIRPORT

"A.D. Coote & Co. designed, fabricated and installed three car park canopies (spanning 120 metres) and a pay shelter for the Busselton Airport project. We also supplied all the light poles for the car park. In order to meet our client's brief, we redesigned and upped the specifications of the original designs for the car park canopies and organised engineering certification for the light poles, canopies and footings. The full installation process and delivery included our contracting of carpenters to install timber details with recycled jarrah."
